EDUCATION

Vellore Institute Of Technology *Chennai, India*
Bachelor of Technology in Computer Science and Engineering *August* 2023 - Present
Shree Sanatan Dharm Education Centre *Kanpur, India*
Secondary and Senior Secondary Education *February 2022*

SKILLS

Technical: SQL, Python, HTML, CSS, JS, Nodejs, Reactjs, Rapid Prototyping and Product Design with AI Tools
Tools: Firebase, Excel, Canva, Figma.

CERTIFICATIONS

- Android App development by Imarticus Learning
- Networking Basics by CISCO

EXPERIENCE

Vedant Learning Centre *Remote*
Product Manager *June 2025 - July 2025*

- Led the end-to-end product lifecycle of a **WhatsApp-based chatbot** for **connecting lawyers with clients**, **translating user pain points** into clear product requirements and worked on rapid prototyping.
- Conceptualized an **AI-powered legal briefing solution** to simplify the user pain point of **navigating lengthy and complex law verdicts and case studies**, enabling faster and more intuitive legal understanding.
- **Designed an admin portal and user management interface**, improving operational efficiency and providing admins with real-time control and visibility.
- Applied an **Agile product development approach**, breaking features into sprints, prioritizing backlog based on user feedback, and continuously iterating to improve chatbot flows, and platform usability and researching on new ideas.
- Collaborated closely with developers and stakeholders to ensure the best outcome of the idea while maintaining high-quality user experiences.

TEDxVIT Club
Board Member - General Secretary *Sep 2024 – Feb 2026*

- **Led recruitment processes by conducting interviews** and shortlisting candidates for department roles to build a high-performing team.
- **Coordinated with all departments**, ensuring smooth execution of events, and operational goals.
- **Delegated responsibilities** to departmental leads and **monitored progress** to maintain accountability and productivity.
- Made and presented **structured reports** on club performance, activities, and strategic outcomes for **leadership review.**
- **Student Representative and Host** for several workshop and seminar events

Olcademy *Remote*
Product Manager Intern *Jan 2026 - Present*

- Drove end-to-end product development as part of the founding PM team for an e-commerce platform **Project-Z**, from ideation to implementation and iteration.
- Enhanced user journey by identifying friction points and implementing improvements to optimize usability and engagement.
- Conceptualized the new restaurant menu feature, improving item discovery and navigation within the platform for better user experience.
- Worked synchronously with design, engineering, and QA teams to build, test, and refine features, ensuring a seamless user experience.

PROJECTS

HDIMS - Health Data Information and Management System *October 2024 - November 2024*

- Conceptualized a Health Data Management mobile app for Patient and Hospital, worked on features enabling users to manage medical history, diet preferences, and health insights effectively.
- Used **Flutter, Firebase, and Gemini API** to implement features such as AI-generated personalized diet plans, authentication, and real-time data sync.

VastraHouse - An Ecommerce Store *September 2025 - October 2025*

- Prototyped a scalable and intuitive clothing e-commerce platform solving **Easy Onboarding of Catalogue for Small scale businesses and conceptualized automation workflow using N8n.**

- **Worked on solving User Pain Points such as automated E-way bill generation, automated catalog generation and product listing via product images**.
- Utilized **React.js, Firebase Auth, Firestore**, and state management for real-time product updates and seamless user experience.

NOTABLE WORKS

Patent Published - *Haptic Feedback Footwear for Terrain Adapted Navigation* - wearable navigation system for visually-impaired people, something more than just a patent idea. *March 2025 - May 2025*
